

SEMTECH®

Broadband Access for Food and Beverage Applications

Restaurant

Coffee Shop

Pub and Bistro

Food Truck

Dining establishments, whether in permanent or temporary locations, need reliable internet connectivity that is quickly implemented to keep credit card transactions, reservation systems and guests online. Broadband Access, an AirVantage® Managed Solution, delivers the fully managed, end-to-end wireless solutions for mission critical connections, while monitoring and remotely managing the network. The solution provides critical connectivity suitable for permanent, temporary, primary and back-up needs.

Broadband Access Benefits

Turnkey solution, optimized for your business

Broadband Access automatically predicts and recommends the optimal wireless connection, based on your restaurant sites. Connectivity is tested upon deployment, ensuring the highest quality wireless connection available. Our solution runs on best-in-class AirLink® routers for cost-effective primary internet, or as intelligent failover connectivity, to ensure there is no disruption to the mission critical connectivity with proactive monitoring and troubleshooting.

Connectivity as a Service, delivered

With Broadband Access there is no equipment to purchase, because everything is included in one monthly price and can be used for cost-effective primary internet, or as intelligent failover connectivity to ensure there is no disruption to mission critical connectivity.

Meets your specific business needs

Flexibility in contract terms means you can find the right solution for your needs — whether you need a short-term, monthly contract or have a longer-term need. Broadband Access provides temporary LTE or 5G connectivity for temporary pop-up retailers, as well as backup connectivity when downtime is not an option. Billing and management data is pooled across all locations, while a multiple carrier solution ensures a network performance with industry-leading SLA.

Why Semtech?

With a rich 25-year history of innovation and proven reliability, we have deployed over 3 million routers globally. We help drive digital transformation, connecting businesses with critical data to save money and create new revenues.

Best-in-Class AirLink® Rugged Routers for Broadband Access

- Rugged MIL-STD hardware platforms for the most demanding industrial and critical infrastructure applications
- Class 1, Division 2 certified, ideal for hazardous environments
- Exceeds the MIL-STD-810G specification for shock, vibration, temperature and humidity
- Fully enclosed die cast aluminum sealing to combat dusty environments
- Compact form factor fits in limited space areas
- Low power to suit limited power installations
- VPN tunneling to support secure communications

Industry's Best Connectivity — Simplified

Top nationwide coverage

Broadband Access works with all 3 major US carrier networks to provide the best quality and coverage for your needs.

Lower data costs

We lower your costs by creating a single company-wide data pool for your multi-site network.

Single point of contact across all networks

All your wireless support, hardware, software and connectivity, is provided by Semtech, eliminating the need to contact multiple vendors. Our dedicated resources will manage your portfolio of AirLink devices.

Flexible contracts

A variety of monthly to yearly plans are available with different contract terms, to provide you with the right choice for your deployment needs.

Professional Device Management and Support

Proactive device management

We monitor device health 24/7/365 and perform regular updates.

Real-time reporting

Broadband Access delivers real-time device and connectivity information for valuable insights into your network health and data usage.

Expert customer care

Our wireless experts and service engineers are available 24/7/365 to assist you with any concerns or questions. Our close relationships and direct access to the top US carriers ensures flawless services and quick time to resolution, should issues arise.

About Semtech

Semtech Corporation (Nasdaq: SMTC) is a high-performance semiconductor, IoT systems and cloud connectivity service provider dedicated to delivering high-quality technology solutions that enable a smarter, more connected and sustainable planet. Our global teams are committed to empowering solution architects and application developers to develop breakthrough products for the infrastructure, industrial and consumer markets.
